**Did You Know:** One of the world's biggest goldfish has been caught, weighing in at 67 lbs. 4 oz.! The enormous specimen was found in a fishery in France by British angler Andy Hackett, who reportedly spent over 25 minutes reeling the fish in. Nicknamed "The Carrot," the fish is a hybrid species of a leather carp and koi carp, which are traditionally orange in color. The Carrot is thought to be more than 20 years old, as it was placed in the BlueWater Lakes fishery in Champagne, France, when it was a guppy. They put The Carrot in about 20 years ago as something different for the customers to fish for. "Since then, it has grown and grown but it doesn't often come out," said the fishery. "She is very elusive."
